A KROLL BUSINESS
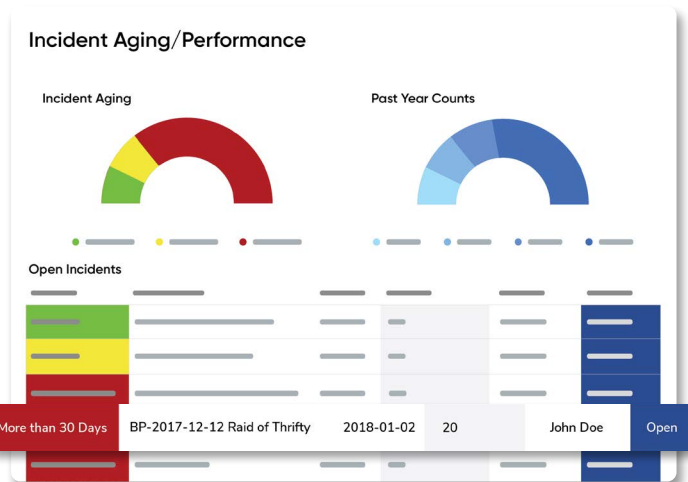

Corporate Security Software

Corporate security professionals are evolving from reactionary and tactical to strategic and risk-aware teams focused on building business value by streamlining operations and reducing the impact of incidents before they happen. Resolver's corporate security software helps security teams at the world's leading organizations manage incidents, investigations, security operations, and risk assessments.
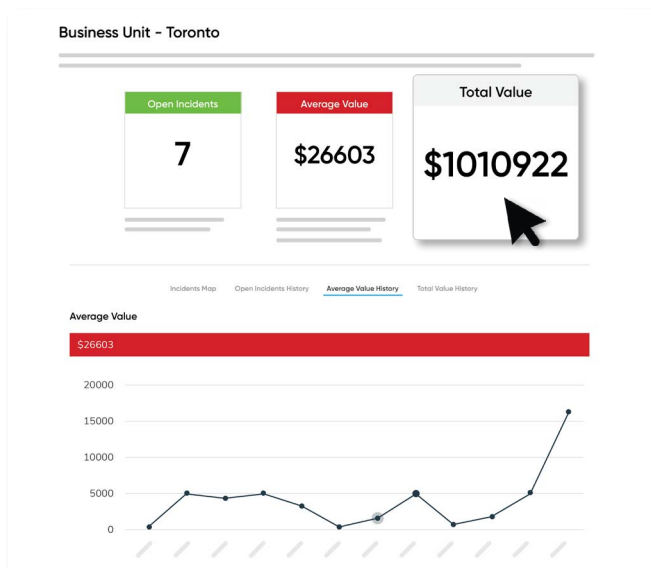

Incident & Investigations Management

Resolver's Incident and Investigations Management Software is an end-to-end solution to help you manage the entire incident lifecycle to reduce incidents and their impacts on your organization. Collect incident details, triage and manage security resources, conduct root cause analyses, trend and report on data to gain insights on risks and losses, and create controls to prevent future occurrences.

This application supports the following use cases:

- Brand Protection
- Loss Prevention
- IT Security
- Case Management
- Violence Threat Assessment

Security Risk Management

Resolver's Security Risk Management solution helps you conduct risk assessments and site audits to identify gaps and prioritize countermeasures and connect incident data with risks to make data-driven decisions. Resolver's software can help you achieve your security objectives regardless of complexity – from basic audits to supporting a full enterprise security risk management program.

This application supports the following use cases:

- Track assets
- Create risk assessments
- Conduct security site audits

Security Operations Management

Resolver's Command Center solution increases the situational awareness of corporate security teams by centralizing event identification, alarm management, response management, incident reporting, and officer and dispatcher communication. Connect dispatchers directly to officers and share dispatch details, locations, and standard operating procedures to manage organizational safety.

This application supports the following use cases:

- Integrate with access control systems
- Dispatch officers
- Document data in-field with mobile app
- Track officer activity

Threat Protection

Resolver's Threat Protection Solution helps you get ahead of threats and prevent incidents. With our qualified team of threat management experts combined with our award-winning threat protection software, security teams can effectively detect, investigate, assess, and report on threats with greater consistency.

- Award-winning software
- Threat management training
- Rapid POI enrichment
- RAGE-V
- WAVR-21

We help industry-leading global brands reduce incidents and minimize their impact on the organization.

SONY   adidas GROUP   TOYOTA   STARBUCKS   SAP
