

# Gain early-notice of potential live stream threats

At Resolver, we take a proactive approach to monitoring the earliest signs of potential events which put your platform at risk

Active, immediate threat involving live-stream platform

Imminent risks to live-stream

Violent events on the horizon which have the potential for live-stream risk

## React swiftly through your next live stream threat

### Scaled Monitoring

We monitor the widest range of chatter outside of your platform for the small clues that provide early-notice of potential live stream threats.

### Expert Human Intelligence

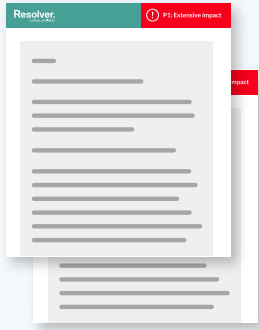

We triage and assess potential threat signals and augment them with rapid-open source intelligence.

### Rapid Alerting

We notify platforms, law enforcement, and protection agencies immediately of potential live streaming threats across multiple channels simultaneously.

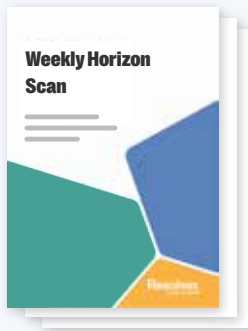

# Be the first to know, and first to act, with best-in-class risk intelligence

## Alerts

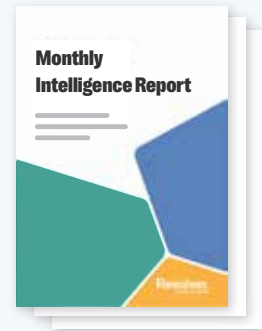

A set of real-time notifications on a developing situation that can be sent in the form of:

Emails, SMS, Slack messages,  
Client-provided API

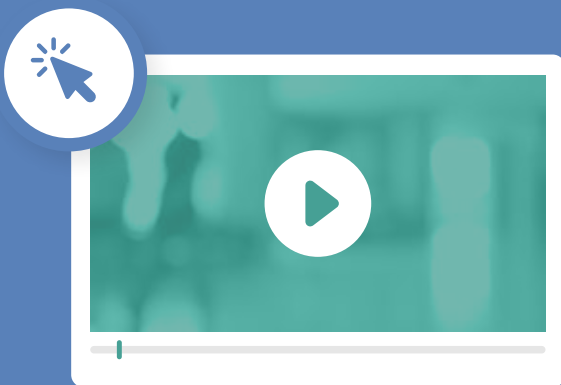

## Weekly Horizon Scan

A 7-day look ahead into events that pose a risk of violence captured on live stream.

## Monthly Intelligence Report

A monthly review of global violent incidents and their impact across social media platforms.

## Red-Teaming

Exercises to test platform resilience to bad actor activity offered in a range of scenarios to meet client needs.
