

Reliably identify, investigate, and mitigate zero-day risks

Proactively safeguard your online community and reputation with our comprehensive moderation and intelligence solutions for platforms

Expert-led human intelligence

Our highly skilled team is made up of hundreds of analysts, across 50+ languages, that swiftly assess, analyze, and triage global risks. Team members have backgrounds including law enforcement, government intelligence, and child safety to ensure our partners are the first to know and first to act, 24/7/365.

Scaled Trust & Safety Solutions

Our AI, human intelligence, and bad actor detection capabilities ensure the nuanced accuracy needed to keep global brand and platform communities safe. With nearly two decades of experience, we create sustainable Trust & Safety solutions within complex and dynamic environments.

Highest standards in wellbeing

Providing integrated mental health support that addresses the complexity of our work is a key pillar for our team. Our wellbeing provisions include a dedicated internal function, with comprehensive resources, tools, and access to a wide range of professionals.

Full coverage of online risks

Our observation of bad actor communities, tactics, and behaviors provides us with expertise in a full taxonomy of online harms to help your teams uncover how risk affects your unique platform user safety and compliance.

Real-time reporting

Identify and mitigate significant risks using our dynamic, strategic and network intelligence reporting. Our reports analyze surface, social, deep, and dark web sources for early warning information.
