

Reputation Monitoring Reports

Our Reputation Monitoring Reports are designed for customers who need targeted, on-demand risk assessments. This service leverages our extensive human intelligence team to deliver timely, high-quality, and thorough reports on specific issues or crises.

Tailored Reporting Frequency: **Daily** | **Weekly** | **Bi-Weekly** | **Monthly** | **Quarterly**

What's Included:

- **Expertise in Hard-to-Detect Risks:** Our human-led approach allows us to delve into sources and detect risks that automated technologies cannot.
- **Crisis Reporting:** Receive swift, detailed reports to manage and mitigate risks during critical moments.
- **Adaptive Service:** Our flexible approach ensures we can meet your evolving needs quickly and efficiently.
- **Multilingual Monitoring:** We monitor in 50+ languages, capturing potential risks often overlooked by tools with limited language support.

No two reports are the same - each one is meticulously tailored to address the unique and specific risks of our clients.

Situation Reports

- ✓ Ideal for evaluating risks and how they develop over time
- ✓ Curated by experienced SME analysts, focusing on your concern risks such as mis/disinformation, supply chain, geopolitical, and more
- ✓ Tailored to customer frequency of evolving risk

Strategic Intelligence Reports

- ✓ Broader reports during periods of special interest covering industry risks, competitor threats, and geopolitical issues
- ✓ In-depth research across multiple platforms, including the deep and dark web
- ✓ Developed in partnership with customer needs

Human-Led Intelligence

Our global team provides in-depth analysis using their experience with OSINT research and techniques.

Deep & Dark Web Scanning

Our analysts access hard-to-reach sources, including the deep and dark web, to identify risks that automated scrapers might miss.

Rapid Response

Get urgent reports within a few hours of a request, ensuring quick insight during crises.

Flexible Service

Easily tweak and customize the service as needed without technological and onboarding limitations.
